**The 50 Most Influential Christians of All Time - Brainz**
Enrico Fermi [1901-1954] was an Italian physicist most notable for his significant contributions to the development of quantum theory, nuclear and particle physics and statistical mechanics. He received the Nobel Prize in Physics in 1938 for his work on induced radioactivity and is considered to be among the
leading scientists of the 20th century.

Street or road name - Wikipedia
A street or road name is an identifying name given to a street or road. In toponymic terminology, names of streets and roads are referred to as hodonyms (from Ancient Greek ὁδός / hodós - road, and ὄνομα / ónoma - name). The street name usually forms part of the address (though addresses in some parts of the world, notably most of Japan, make no reference to street names).
