**Non-prototypical Clefts in French**-Lena Karssenberg 2018-09-24 This monograph is the first large-scale corpus analysis of French il y a clefts. While most research on clefts focusses on the English ‘prototypical’ it-cleft and its equivalents across languages, this study examines the lesser-known il y a clefts – of both presentational-eventive and specificational type – and provides an in-depth analysis of their syntactic, semantic and discourse-functional properties. In addition to an extensive literature review and a comparison with Italian c’è clefts and with French c’est clefts, the strength of the study lies in the critical approach it develops to the common definition of clefts. Several commonly used criteria for clefts are applied to the corpus data, revealing that these criteria often lead to ambiguous results. The reasons for this ambiguity are explored, thus leading to a better understanding of what constitutes a cleft. In this sense, the analysis will be of interest to specialists of Romance and non-Romance clefts alike.

**General Relativity**-Robert M. Wald 2010-05-15 “Wald's book is clearly the first textbook on general relativity with a totally modern point of view; and it succeeds very well where others are only partially successful. The book includes full discussions of many problems of current interest which are not treated in any extant book, and all these matters are considered
with perception and understanding."—S. Chandrasekhar "A tour de force: lucid, straightforward, mathematically rigorous, exacting in the analysis of the theory in its physical aspect."—L. P. Hughston, Times Higher Education Supplement "Truly excellent. . . A sophisticated text of manageable size that will probably be read by every student of relativity, astrophysics, and field theory for years to come."—James W. York, Physics Today

**Threads and Traces**-Carlo Ginzburg 2012-09-02 "This book is a translation of historian Carlo Ginzburg’s latest collection of essays. Through the detective work of uncovering a wide variety of stories or microhistories from fragments, Ginzburg takes on the bigger questions: How do we draw the line between truth and fiction? What is the relationship between history and memory? Stories range from medieval Europe, the inquisitional trial of a witch, seventeenth-century antiquarianism, and twentieth-century historians."-Provided by publisher.

**Architectonics of Game Spaces**-Andri Gerber 2020-03-31 What consequences does the design of the virtual yield for architecture and to what extent can the nature of architecture be used productively to turn game-worlds into sustainable places - over here, in »reality«? This pioneering collection gives an overview of contemporary developments in designing video games and of the relationships such practices have established with the design of architecture. Due to their often simulatory nature, games reveal constructions of reality while positively impacting spatial ability and allowing for alternative avenues to complex topics and processes of negotiation. Granting insight into the merging of the design of real and virtual environments, this volume offers an invaluable platform for further debate.
Yayoi Kusama - Sarah Suzuki
2017-07-27 Growing up in the mountains of Japan, Yayoi Kusama (b. 1929) dreamed of becoming an artist. One day, she had a vision in which the world and everything in it—the plants, the people, the sky—were covered in polka dots. She began to cover her paintings, drawings, sculptures, and even her body with dots. As she grew up, she traveled all around the world, from Tokyo to Seattle, New York to Venice, and brought her dots with her. Different people saw these dots in different ways—some thought they were tiny, like cells, and others imagined them enormous, like planets. Every year, Kusama sees more of the world, covering it with dots and offering people a way to experience it the way she does. Written by Sarah Suzuki, a curator at The Museum of Modern Art, and featuring reproductions of Kusama's instantly recognizable artworks, this colorful book tells the story of an artist whose work will not be complete until her dots cover the world, from here to infinity.

The Name of this Book Is Secret - Pseudonymous Bosch
2008-09-01 Read the series that's sold more than 2 million copies—if you dare! Warning: this description has not been authorized by Pseudonymous Bosch. As much as he'd love to sing the praises of his book (he is very vain), he wouldn't want you to hear about his brave 11-year old heroes, Cass and Max-Ernest. Or about how a mysterious box of vials, the Symphony of Smells, sends them on the trail of a magician who has vanished under strange (and stinky) circumstances. And he certainly wouldn't want you to know about the hair-raising adventures that follow and the nefarious villains they face. You see, not only is the name of this book secret, the story inside is, too. For it concerns a secret. A Big Secret.

Cosmic Shift - Ilya Kabakov
2017-10-05 A TLS Book of the Year 2017 In this, the first anthology of Russian contemporary art writing to be published outside Russia, many of the country's most
prominent contemporary artists, writers, philosophers, curators and historians come together to examine the region's contemporary art, culture and theory. With contributions from Ilya and Emilia Kabakov, Boris Groys, Dmitri Prigov, Anton Vidokle, Keti Chukhrov, Oxana Timofeeva, Pavel Pepperstein, Arseny Zhilyaev and Masha Sumnina amongst many others, this definitive collection reveals a compelling portrait of a vibrant and complex culture: one built on a contradicting dialectic between the material and the ideal, and battling its own histories and ideologies.

Art-David Scott 2015-07-31
This book is concerned with how we perceive the authenticity of art objects and asks: What does authenticity mean? Who defines what an authentic or inauthentic artwork is? How has the concept of what constitutes the authentic changed over the past few thousand years and how might this interact with conservation and restoration? Do different cultures have different views on what authenticity is, and if so, how does this affect the notion of forgery or restoration? Are there degrees of authenticity or inauthenticity? How can we apply the notion of authenticity to ethnographic art or to intangible cultural heritage? Do alterations of substance (during restoration) affect the material authenticity, conceptual authenticity or meaning of art objects? The author examines the recent renewed interest in the problems of the inauthentic, namely the world of fakes and forgeries, restoration, replication, emulation, appropriation and falsification of works of art.

**Magritte**-Marcel Paquet
2015-10-09 Meet the Belgian Surrealist forever on the hunt for magic and mystery. This introduction to Magritte presents key works from the artist's vast repertoire of visual humor, paradox, and surprise which makes us look and look again, not only at the painting, but at our sense of self and the world.

**Magritte**-Vincent Zabus
2017-11-07 Intoxicated by the promise of a promotion, Charles Singular for once allows himself a small extravagance: he buys a bowler hat. But there's a problem: this is no ordinary hat. This one once belonged to the surrealist painter René Magritte, and by donning it Charles has unwittingly stepped into the artist's off-kilter world. What's more, he can't escape--at least, not until he has illuminated the secrets behind Magritte's work. What follows is a hallucinatory journey through Magritte's imaginative landscape, a place where facial features mutate, the crescent moon appears in unexpected places, and answers prove frustratingly elusive. In Magritte: This is not a Biography, Vincent Zabus and Thomas Campi have created a panoramic and revealing portrait of the great surrealist, employing a playfulness and wit reminiscent of Magritte himself.

**Sonia Delaunay**-Cara Manes
2017-06-13 Sonia Delaunay (1885-1979), painter and textile, theater, and fashion designer, made enormous contributions to the development of abstraction in the early 1910s, partly because of her son, Charles. In this new book, Delaunay and six-year-old Charles have a fantastical adventure in a world of color and form, a magical road trip in their car, modeled after her 1925...
design for a Citroen convertible. They glide into a landscape of colors and shapes drawn from Delaunay's early abstract compositions--it's as if they've driven into one of her paintings. Mother and son also explore the artist’s gorgeous, colorful designs for fabrics and clothing. Throughout, Delaunay helps Charles understand her artistic process and that of her husband, artist Robert Delaunay, by asking him what shapes and colors he recognizes along the way. They end up back in the real world, and Charles realizes that his mother's thoughts about art permeate every aspect of their life.

**Heterotopia and the City**

Michiel Dehaene 2008-05-15

Heterotopia, literally meaning ‘other place’, is a rich concept in urban design that describes a space that is on the margins of ordered or civil society, and one that possesses multiple, fragmented or even incompatible meanings. The term has had an impact on architectural and urban theory since it was coined by Foucault in the late 1960s but it has remained a source of confusion and debate since. Heterotopia and the City seeks to clarify this concept and investigates the heterotopias which exist throughout our contemporary world: in museums, theme parks, malls, holiday resorts, gated communities, wellness hotels and festival markets. With theoretical contributions on the concept of heterotopia, including a new translation of Foucault’s influential 1967 text, Of Other Space and essays by well-known scholars, the book comprises a series of critical case studies, from Beaubourg to Bilbao, which probe a range of (post)urban transformations and which redirect the debate on the privatization of public space. Wastelands and terrains vagues are studied in detail in a section on urban activism and transgression and the reader gets a glimpse of the extremes of our dualized, postcivil condition through case studies on Jakarta, Dubai, and Kinshasa. Heterotopia and the City provides a collective effort to reposition heterotopia as a
crucial concept for contemporary urban theory. The book will be of interest to all those wishing to understand the city in the emerging postcivil society and post-historical era. Planners, architects, cultural theorists, urbanists and academics will find this a valuable contribution to current critical argument.

**Brain Art and Neuroscience**-David Gruber
2020-05-25 The first of its kind, this book examines artistic representations of the brain after the rise of the contemporary neurosciences, examining the interplay of art and science and tackling some of the critical-cultural implications. Weaving an MRI pattern onto a family quilt. Scanning the brain of a philosopher contemplating her own death and hanging it in a museum. Is this art or science or something in-between? What does it mean? How might we respond? In this ground-breaking new book, David R. Gruber explores the seductive and influential position of the neurosciences amid a growing interest in affect and materiality as manifest in artistic representations of the human brain. Contributing to debates surrounding the value and/or purpose of interdisciplinary engagement happening in the neurohumanities, Gruber emphasizes the need for critical-cultural analysis within the field. Engaging with New Materialism and Affect Theory, the book provides a current and concrete example of the ongoing shift away from constructivist lenses, arguing that the influence of relatively new neuroscience methods (EEG, MRI and fMRI) on the visual arts has not yet been fully realised. In fact, the very idea of a brain as it is seen and encountered today—or "The Brain," as Gruber calls it—remains in need of critical, wild and rebellious re-imagination. Illuminating how artistic engagement with the brain is often sensual and suggestive even if rooted in objectivist impulses and tied to scientific realism, this book is ideal for scholars in Art, Media Studies, Sociology, and English departments, as well visual artists and anyone
seriously engaging discourses of the brain.

**Apple**-Marcia Reiss  
2014-11-15 Gala and Honeycrisp. Pink Lady and Pacific Rose. King Luscious and Winesap. The names of apples are as juicy as the fruit itself. One of the most widely distributed fruits on the planet, apples have always meant something beyond food and drink—their seeds have been planted deep within the myths, religion, and art of nearly every culture. They are symbols of beauty, desire, and sin; signs of hidden poisons and healthy eating; emblems of computers, phones, and music. Exploring the symbolism, art, and literature of the apple, as well as its botanical background, Marcia Reiss follows this iconic fruit from its origins to its now-ubiquitous presence in our world. Journeying back to the apple’s germination in the mountains of Central Asia, Reiss travels along the Silk Road to Europe and the New World. She reveals that, from Charlemagne to Johnny Appleseed to the colonization of South Africa, where settlers were required to plant apple orchards that led to the development of new towns, apples have become a global commodity. In addition to delving into the latest debates about chemical sprays, Reiss looks at the rise of heirloom orchards and the hopes and fears of genetic developments. She also tells the parallel tale of apple cider, its decline during the Temperance Movement and its return as an artisanal alternative to wine. Beautifully illustrated with historic and contemporary images and containing a directory of popular and heirloom varieties, Apple is a book ripe for devouring.

**I Am An Artist**-Marta Altés  
2014-12-04 Meet the boy who can't stop creating art! He loves colours, shapes, textures and EVERYTHING inspires him: his socks, the contents of the fridge, even his cat gets a new coat (of paint!). But there's just one problem: his mum isn't quite so enthusiastic. In fact, she seems a little cross! But this boy has a plan to make his mum smile. He's about to
create his finest piece yet and on a very grand scale . . .
Funny, irreverent and perfect for creative children and adults, I Am An Artist by Marta Altés is a sharp, silly, fabulous book which shows that art is EVERYWHERE!

Sensory Perception-
Friedrich G. Barth 2012-10-13
Sensory perception: mind and matter aims at a deeper understanding of the many facets of sensory perception and their relations to brain function and cognition. It is an attempt to promote the interdisciplinary discourse between the neurosciences and psychology, which speaks the language of cognitive experiences, and philosophy, which has been thinking about the meaning and origin of consciousness since its beginning. Leading experts contribute to such a discourse by informing the reader about exciting modern developments, both technical and conceptual, and by pointing to the big gaps still to be bridged. The various chapters provide access to scientific research on sensory perception and the mind from a broad perspective, covering a large spectrum of topics which range from the molecular mechanisms at work in sensory cells to the study of the unconscious and to neurophilosophy.

Animation: A World History-Giannalberto Bendazzi 2015-11-06 A continuation of 1994’s groundbreaking Cartoons, Giannalberto Bendazzi’s Animation: A World History is the largest, deepest, most comprehensive text of its kind, based on the idea that animation is an art form that deserves its own place in scholarship. Bendazzi delves beyond just Disney, offering readers glimpses into the animation of Russia, Africa, Latin America, and other often-neglected areas and introducing over fifty previously undiscovered artists. Full of first-hand, never before investigated, and elsewhere unavailable information, Animation: A World History encompasses the history of animation production on every continent over the span of three centuries. Volume III catches
you up to speed on the state of animation from 1991 to present. Although characterized by such trends as economic globalization, the expansion of television series, emerging markets in countries like China and India, and the consolidation of elitist auteur animation, the story of contemporary animation is still open to interpretation. With an abundance of first-hand research and topics ranging from Nickelodeon and Pixar to modern Estonian animation, this book is the most complete record of modern animation on the market and is essential reading for all serious students of animation history.

Key Features
- Over 200 high quality head shots and film stills to add visual reference to your research
- Detailed information on hundreds of never-before researched animators and films
- Coverage of animation from more than 90 countries and every major region of the world
- Chronological and geographical organization for quick access to the information you’re looking for
is a wondrous thing - especially to the king himself. He spends his days admiring and grooming it, and passes laws making it a crime punishable by death for anyone else's face to sport even a single hair. As the people of the kingdom nervously shave daily, the royal beard grows and grows until it appears at the palace's back gate. What happens next will have readers laughing along -- and cheering for the astronomers who, unlike the tyrannical king, know that the earth is round.

**Imagining Extinction** - Ursula K. Heise 2016-08-10

La 4e de couverture de la jaquette indique : "How should science be written? It is a question that piqued natural philosophers of the seventeenth century as they experimented with the rhetorical figures, neologisms, verse-forms, and generic variety that characterise the literary texture of their work. Inspired laymen were quick to borrow from the new philosophy and from practising scientists in order to deploy ideas and images from astronomy, optics, chemistry, biology, and medicine. Between them, scientists, natural historians, poets, dramatists, and essayists produced new, adjusted, or hybrid literary forms. The Poetics of Scientific Investigation in Seventeenth-Century England examines those forms and that literary-scientific texture, as well as representations of the scientific--the laboratory, collaborative experimental retirement, and the canons of scientific conversation--and proposes that the writing of seventeenth-century science mirrors the intellectual and investigative processes of early-modern science itself."

**René Magritte** - René Magritte 2012 René Magritte was a surrealist artist whose thought-provoking works used ordinary objects to challenge how viewers perceived reality. His extensive oeuvre was documented in a comprehensive 5-volume project. This volume looks at
his oil paintings, gouaches and drawings.

**Narrative Mechanics**-Beat Suter 2021-05-31 What do stories in games have in common with political narratives? This book identifies narrative strategies as mechanisms for meaning and manipulation in games and real life. It shows that the narrative mechanics so clearly identifiable in games are increasingly used (and abused) in politics and social life. They have »many faces«, displays and interfaces. They occur as texts, recipes, stories, dramas in three acts, movies, videos, tweets, journeys of heroes, but also as rewarding stories in games and as narratives in society - such as a career from rags to riches, the concept of modernity or market economy. Below their surface, however, narrative mechanics are a particular type of motivational design - of game mechanics.

**Cher Ami and Major Whittlesey**-Kathleen Rooney 2020 "Brilliant and surprising at every turn."--Rebecca Makkai, Pulitzer finalist for The Great Believers A heart-tugging and gorgeously written novel based on the incredible true story of a WWI messenger pigeon and the soldiers whose lives she forever altered, from the author of Lillian Boxfish Takes a Walk. From the green countryside of England and the gray canyons of Wall Street come two unlikely heroes: one a pigeon and the other a soldier. Answering the call to serve in the war to end all wars, neither Cher Ami, the messenger bird, nor Charles Whittlesey, the army officer, can anticipate how their lives will briefly intersect in a chaotic battle in the forests of France, where their wills will be tested, their fates will be shaped, and their lives will emerge forever altered. A saga of hope and duty, love and endurance, as well as the claustrophobia of fame, Cher Ami and Major Whittlesey is a tragic yet life-affirming war story that the world has never heard. Inspired by true events of
World War I, Kathleen Rooney resurrects two long-forgotten yet unforgettable figures, recounting their tale in a pair of voices that will change the way readers look at animals, freedom, and even history itself.

Lillian Boxfish Takes a Walk-Kathleen Rooney 2017-01-17 NOW A NATIONAL INDIE BESTSELLER

"Transporting...witty, poignant and sparkling."
—People (People Picks Book of the Week) "Prescient and quick....A perfect fusing of subject and writer, idea and ideal."
—Chicago Tribune

"Extraordinary...hilarious...Elegantly written, Rooney creates a glorious paean to a distant literary life and time—and an unabashed celebration of human connections that bridge past and future. —Publishers Weekly (starred and boxed)

"Rooney's delectably theatrical fictionalization is laced with strands of tart poetry and emulates the dark sparkle of Dorothy Parker, Edna St. Vincent Millay, and Truman Capote. Effervescent with verve, wit, and heart, Rooney’s nimble novel celebrates insouciance, creativity, chance, and valor."
—Booklist (starred review) "In my reckless and undiscouraged youth," Lillian Boxfish writes, "I worked in a walnut-paneled office thirteen floors above West Thirty-Fifth Street..." She took 1930s New York by storm, working her way up writing copy for R.H. Macy’s to become the highest paid advertising woman in the country. It was a job that, she says, “in some ways saved my life, and in other ways ruined it.” Now it’s the last night of 1984 and Lillian, 85 years old but just as sharp and savvy as ever, is on her way to a party. It’s chilly enough out for her mink coat and Manhattan is grittier now—her son keeps warning her about a subway vigilante on the prowl—but the quick-tongued poetess has never been one to scare easily. On a walk that takes her over 10 miles around the city, she meets bartenders, bodega clerks, security guards, criminals, children,
parents, and parents-to-be, while reviewing a life of excitement and adversity, passion and heartbreak, illuminating all the ways New York has changed—and has not. A love letter to city life in all its guts and grandeur, Lillian Boxfish Takes a Walk by Kathleen Rooney paints a portrait of a remarkable woman across the canvas of a changing America: from the Jazz Age to the onset of the AIDS epidemic; the Great Depression to the birth of hip-hop. Lillian figures she might as well take her time. For now, after all, the night is still young.

La storia e le sue immagini: Cronologia e indici - 2003

When an Elephant Falls in Love - Davide Cali 2016-12-20 From the bestselling author of I Didn't Do My Homework Because... comes an irresistible meditation on the quest for connection. When an elephant falls in love, he does many foolish things. He hides when the elephant-object of his affection is around. He writes dozens of letters that he will never send. And he tries to be healthy, but ends up finishing the cheesecake. This soulful book is at once relatable and revealing, a reminder that love is worth striving for, and that the very best things in life will come to those who wait. Plus, this is the fixed format version, which looks almost identical to the print edition.
