Traffic management - Wikipedia
Traffic management is a key branch within logistics. It concerns the planning, control and purchasing of transport services needed to physically move vehicles (for example aircraft, road vehicles, rolling stock and watercraft) and freight. Traffic management is implemented by people working with different job titles in different branches:

What are Management Control Systems (MCS)? - Definition
Definition: Management control systems are the formal and informal structures put in place by a business that compare the goals and strategy of the organization against the actual outcomes. In other words, it measure how well the functions of a business and the business as a whole perform and meet objectives. This comparison is then reviewed and used to drive managerial decisions.

Methods to Control Varroa Mites: An Integrated Pest
May 23, 2019 · Beekeepers can use an integrated pest management (IPM) approach in which they use several different mite control techniques in combination or in rotation throughout the year. A combination of various treatment protocols is effective and it reduces the likelihood that resistance
to chemicals will develop, as happens when only one treatment
