Oct 28, 2016 · Sustainable urban planning involves many disciplines, including architecture, engineering, biology,
environmental science, materials science, law and more.

Environmental Design Library | UC Berkeley Library
History. In 1964, when Wurster Hall was completed, the Environmental Design Library was formed by merging
four departmental libraries: Architecture (founded by John Galen Howard in 1963); Landscape Architecture
(founded by John Gregg, 1913); City and Regional Planning (founded in 1948 by Holway R. Jones); and Decorative
Arts, formerly Household Arts (founded in 1919).

Sustainable architecture - Wikipedia
Sustainable architecture is architecture that seeks to minimize the negative environmental impact of buildings by
efficiency and moderation in the use of materials, energy, development space and the ecosystem at large.
Sustainable architecture uses a conscious approach to energy and ecological conservation in the design of the
built environment.

Environmental governance - Wikipedia
Environmental governance is a concept in political ecology and environmental policy that advocates sustainability
(sustainable development) as the supreme consideration for managing all human activities—political, social and
economic. Governance includes government, business and civil society, and emphasizes whole system
management. To capture this diverse range of elements, environmental

How to Become an Urban Planner | EnvironmentalScience.org
