This classic book on available light photography is back, thoroughly updated for digital photography and, for the first time, is packed with stunning, full color images throughout. Creating great images under less-than-ideal lighting conditions is one of the most difficult, yet rewarding, experiences in photography. Challenge yourself, and with...
this book by your side you won’t be disappointed. Photography expert Joe Farace and Pulitzer Prize winner Barry Staver use real-world examples of their own images to give you invaluable advice on how to get the shot right the first time. From practical tips, such as how to deal with inclement weather while shooting outdoors, to detailed information about getting great shots at your cousin’s or your client’s wedding, to brand new chapters on noise and white balance, you’ll find everything that you need to turn your ordinary night and low-light shots into masterful works of art.

Lighting for Digital Photography - Syl Arena

2012-10-07 Now that you’ve had your DSLR for a while, are you ready to take a much closer look at what creating a great image is all about? It’s all about light! The ability to see, influence, modify, control, and create light will take your images from snapshots to great shots! In Lighting for Digital Photography: From Snapshots to Great Shots, photographer and bestselling author Syl Arena begins with a primer on light itself—how to see its direction, intensity, color, contrast, and hardness—and quickly moves on to discussions of shooting both indoors and outdoors in the many different conditions of natural or man-made light. Then the book digs in to begin creating light with photographic lights, whether that’s small flash or big strobe, the pop-up flash on your DSLR or continuous lights. Follow along with Syl and you will: Learn the basics (and beyond) of light modifiers that make light bigger and softer, such as umbrellas, softboxes, beauty dishes, and diffusion panels Understand how to control and shape the light itself with
flags, grids, snoots, and the zoom function on your flash. Appreciate the color temperature of light (whether that’s the sun, a light bulb, or a flash), and how to influence it with white balance settings on your camera and colored gels on your flash. Learn how to take great pictures across many different genres, from product and still life images, to simple (and not so simple) portraits and group shots.

With Lighting for Digital Photography: From Snapshots to Great Shots, you’ll learn not only how light behaves—you’ll learn all you need to know to get started on the journey of creating and controlling light in order to make great shots. And once you’ve got the shot, show it off! Join the book’s Flickr group, share your photos, and discuss how you get great shots at flickr.com/groups/lightingfromsnapshotstogreatshots.

Shooting in Sh*tty Light
Lindsay Adler 2012-10-04
Sometimes photographers have to shoot in less than ideal lighting situations. Maybe the wedding is mid-day in the middle of a field, or perhaps the event is in a florescent-lit room. These scenarios can be particularly intimidating for beginning photographers who don't know how to handle the many undesirable lighting situations they may encounter. In Shooting in Sh*tty Light, professional photographers Lindsay Adler and Erik Valind cover the top ten worst lighting situations and provide a variety of solutions for each. They explain which solutions are most practical and why one option might be preferable over another, examining such problems as extremely low lighting when no flash is allowed, strong backlight, and the light on an overcast day. Unlike other books that focus on natural light or lighting in general, this book addresses a very real need of beginning photographers, answering the question, “What do I do when the lighting is terrible?”

Lindsay and Erik candidly show you the tools at your disposal, demonstrating the techniques essential to getting the job done with minimal fuss. Shows how to deal with ten of the worst lighting situations, such as harsh midday light, extremely low light, and mixed light. Offers real-life examples and practical solutions for handling poor light, such as identifying natural reflectors, bouncing light off a wall, or utilizing flash gels. Features a fun, conversational style to help you conquer the fear of poor lighting and approach any lighting situation with confidence!
