Until recently, American history textbooks have boiled down the War for Independence to a mere seventy-two pages and a chapter with the title "The Founding Fathers." Joseph J. Ellis, author of 'American Sphinx: The Life and Times of Carl Sandburg,' has done the same with 'Founding Brothers.' He has written a授权: 'For the Founding Brothers' as a way to capture the breadth of the War for Independence in a single narrative.

His book, which is distributed by Liveright, a division of W.W. Norton & Company, is an effort to piece together the "crude, half-baked, and often contradictory" characters of the early Republic. It marks the publication of the first major biography of Thomas Jefferson since the death of Woodrow Wilson.
