**Why Do Bees Buzz?**—Elizabeth Capaldi Evans 2010

Twenty-five thousand species of bees certainly create a loud buzz. Yet silence descended a few years ago when domesticated bee populations plummeted. Bees, in particular honey bees, are critical links in the vibrant chain that brings fruits, vegetables, and nuts to markets and dinner tables across the country. Farmers and scientists on the agricultural frontlines quickly realized the impact of this loss, but many others did not see this devastation. *Why Do Bees Buzz?* reports on the mysterious "colony collapse disorder" that has affected honey bee populations, as well as other captivating topics, such as their complex, highly social lives, and how other species of bees are unique and different from honey bees. Organized in chapters that cover everything from these provocative pollinators' basic...
biology to the aggressive nature of killer bees, this insightful question and answer guide provides a honeycomb of compelling facts. With clarity and depth, bee biologist Elizabeth Capaldi Evans and coauthor Carol A. Butler examine the lives of honey bees, as well as other species such as orchid bees, bumblebees, and stingless bees. Accessible to readers on every level, and including the latest research and theory for the more sophisticated reader, the authors reveal more than one hundred critical answers to questions about the lives of bees. Concepts about speciation, evolutionary adaptation and pollination, as well as historical details about topics such as Mayan beekeeping and the appearance of bees in rock art, are arranged in easy-to-follow sidebars that highlight the text. Color and black and white photographs and drawings enhance the beauty and usefulness of Why Do Bees Buzz?

Black Workers Remember-Michael K. Honey 2000-01-03

The labor of black workers has been crucial to economic development in the United States. Yet because of racism and segregation, their contribution remains largely unknown. Spanning the 1930s to the present, Black Workers Remember tells the hidden history of African American workers in their own words. It provides striking firsthand accounts of the experiences of black southerners living under segregation in Memphis, Tennessee. Eloquent and personal, these oral histories comprise a unique primary source and provide a new way of understanding the black labor experience during the industrial era. Together, the stories demonstrate how black workers resisted racial apartheid in American industry and underscore the active role of black working people in history. The individual stories are arranged thematically in chapters on labor organizing, Jim Crow in the workplace, police brutality, white union racism, and civil rights struggles. Taken together, the stories ask us to rethink the conventional understanding of
the civil rights movement as one led by young people and preachers in the 1950s and 1960s. Instead, we see the freedom struggle as the product of generations of people, including workers who organized unions, resisted Jim Crow at work, and built up their families, churches, and communities. The collection also reveals the devastating impact that a globalizing capitalist economy has had on black communities and the importance of organizing the labor movement as an antidote to poverty. Michael Honey gathered these oral histories for more than fifteen years. He weaves them together here into a rich collection reflecting many tragic dimensions of America's racial history while drawing new attention to the role of workers and poor people in African American and American history.

**Assessment in Science**
Maureen McMahon 2006 If you want the latest research about assessment techniques that really work, you want Assessment in Science. This collection of informative, up-to-date reports is by authors who are practicing K - 12 classroom teachers and university-based educators and researchers. Working in teams, they tried out and evaluated different assessment approaches in actual classrooms. The research is sound, but that doesn't mean it's hard to grasp. The book stays true to its title by capturing practical lessons in accessible language. As the introduction notes, the reports feature "classroom testing stories, standards-based assessment techniques, teaching-testing dilemmas, portfolio struggles and triumphs, and knowledge of the research on assessment." The 18 chapters are structured for ease of comprehension, moving from
a detailed description of how the research was carried out, to research finding, to concrete implications for the classroom. There is also a "Links to Standards" box and resources list in each chapter. Included throughout are 28 tables and 25 figures, some of which are classroom rubrics teachers can actually use. Though it's enlightening for classroom teachers at all levels, Assessment in Science is also ideal for curriculum supervisors and professors who teach science education, and anyone else who needs to know what's most current in proven assessment techniques.

**Questions of Possibility**
David Caplan 2004-12-30
Questions of Possibility examines the particular forms that contemporary American poets favor and those they neglect. The poets' choices reveal both their ambitions and their limitations, the new possibilities they discover and the traditions they find unimaginable. By means of close attention to the sestina, ghazal, love sonnet, ballad, and heroic couplet, this study advances a new understanding of contemporary American poetry. Rather than pitting "closed" verse against "open" and "traditional" poetry against "experimental," Questions of Possibility
explores how poets associated with different movements inspire and inform each other's work. Discussing a range of authors, from Charles Bernstein, Derek Walcott, and Marilyn Hacker to Agha Shahid Ali, David Caplan treats these poets as contemporaries who share the language, not as partisans assigned to rival camps. The most interesting contemporary poetry crosses the boundaries that literary criticism draws, synthesizing diverse influences and establishing surprising affinities. In a series of lively readings, Caplan charts the diverse characteristics and accomplishments of modern poetry, from the gay and lesbian love sonnet to the currently popular sestina.

**How People Learn** - National Research Council 2000-08-11
First released in the Spring of 1999, How People Learn has been expanded to show how the theories and insights from the original book can translate into actions and practice, now making a real connection between classroom activities and learning behavior. This edition includes far-reaching suggestions for research that could increase the impact that classroom teaching has on actual learning. Like the original edition, this book offers exciting new research about the mind and the brain that provides answers to a number of compelling questions. When do infants begin to learn? How do experts learn and how is this different from non-experts? What can teachers and schools do with curricula, classroom settings, and teaching methods—to help children learn most effectively? New evidence from many branches of science has significantly added to our understanding of what it means to know, from the neural processes that occur during learning to the influence of culture on what people see and absorb. How People Learn examines these findings and their implications for what we teach, how we teach it, and how we assess what our children learn. The book uses exemplary teaching to illustrate how approaches based on what we now know result in in-depth learning. This new knowledge calls into question concepts and practices firmly entrenched in our current education system. Topics include: How learning actually changes the physical structure of the brain. How existing knowledge affects what people notice and how they learn. What the thought processes of experts tell us about how to teach. The amazing learning potential of

**The Tea Girl of Hummingbird Lane**—Lisa See

2017-03-21 A thrilling new novel from #1 New York Times bestselling author Lisa See explores the lives of a Chinese mother and her daughter who has been adopted by an American couple. Li-yan and her family align their lives around the seasons and the farming of tea. There is ritual and routine, and it has been ever thus for generations. Then one day a jeep appears at the village gate—the first automobile any of them have seen—and a stranger arrives. In this remote Yunnan village, the stranger finds the rare tea he has been seeking and a reticent Akha people. In her biggest seller, Snow Flower and the Secret Fan, See introduced the Yao people to her readers. Here she shares the customs of another Chinese ethnic minority, the Akha, whose world will soon change. Li-yan, one of the few educated girls on her mountain, translates for the stranger and is among the first to reject the rules that have shaped her existence. When she has a baby outside of wedlock, rather than stand by tradition, she wraps her daughter in a blanket, with a tea cake hidden in her swaddling, and abandons her in the nearest city. After mother and daughter have gone their separate ways, Li-yan slowly emerges from the security and insularity of her village to encounter modern life while Haley grows up a privileged and well-loved California girl. Despite Haley’s happy home life, she wonders about her origins; and Li-yan longs for her lost daughter. They both search for and find answers in the tea that has shaped their family’s destiny for generations. A powerful story about a family, separated by circumstances, culture, and distance, Tea Girl of Hummingbird Lane paints an unforgettable portrait of a little known region and its people and celebrates the
bond that connects mothers and daughters.

Requiem at the Refuge-Carol Anne O'Marie 2000-03-09 San Francisco's zany but lovable nun, Mary Helen, once again must uncover a murder when a young woman who frequents a drop-in center for abused women is killed.

Women in Scripture-Carol Meyers 2000-03-30 “This splendid reference describes every woman in Jewish and Christian scripture . . . monumental” (Library Journal). In recent decades, many biblical scholars have studied the holy text with a new focus on gender. Women in Scripture is a groundbreaking work that provides Jews, Christians, or anyone fascinated by a body of literature that has exerted a singular influence on Western civilization a thorough look at every woman and group of women mentioned in the Bible, whether named or unnamed, well known or heretofore not known at all. They are remarkably varied—from prophets to prostitutes, military heroines to
musicians, deacons to dancers, widows to wet nurses, rulers to slaves. There are familiar faces, such as Eve, Judith, and Mary, seen anew with the full benefit of the most up-to-date results of biblical scholarship. But the most innovative aspect of this book is the section devoted to the many females who in the scriptures do not even have names. Combining rigorous research with engaging prose, these articles on women in the Hebrew Bible, the Apocryphal/Deuterocanonical Books, and the New Testament will inform, delight, and challenge readers interested in the Bible, scholars and laypeople alike. Together, these collected histories create a volume that takes the study of women in the Bible to a new level.

**A Taste of Honey**-Shelagh Delaney

2014-10-13 It's chaotic - a bit of love, a bit of lust and there you are. We don't ask for life, we have it thrust upon us. Written by Shelagh Delaney when she was nineteen, A Taste of Honey is one of the great defining and taboo-breaking plays of the 1950s. When her mother, Helen, runs off with a car salesman, feisty teenager Jo takes up with a black sailor who promises to marry her before he heads for the seas, leaving her pregnant and alone. Art student Geoff moves in and assumes the role of surrogate parent until misguidedy, he sends for Helen and their unconventional setup unravels. A Taste of Honey offers an explosive celebration of the vulnerabilities and strengths of the female spirit in a deprived and restless world. Bursting with energy and daring, this exhilarating and angry depiction of harsh, working-class life in post-war Salford is shot through with love and humour, and infused with jazz. The play was first presented by Theatre Workshop at the Theatre Royal Stratford, London, on 27 May 1958.

Investment Performance Measurement-Philip Lawton, CIPM 2009-04-28 Investment Performance Measurement

Over the past two decades, the importance of measuring, presenting, and evaluating investment performance results has dramatically increased. With the growth of capital market data services, the development of quantitative analytical techniques, and the widespread acceptance of Global Investment Performance Standards (GIPS®), this discipline has emerged as a central component of effective asset management and, thanks in part to the Certificate in Investment Performance Measurement (CIPM) program, has become a recognized area of specialization for investment professionals. That's why Investment Performance Measurement: Evaluating and Presenting Results—the second essential title in the CFA Institute Investment Perspectives series—has been created. CFA Institute has a long tradition of publishing content from industry thought leaders, and now this new collection offers unparalleled guidance to those working in the rapidly evolving field of investment management.

Drawing from the Research Foundation of CFA Institute, the Financial Analysts Journal, CFA Institute Conference Proceedings Quarterly, CFA Magazine, and the CIPM curriculum, this reliable resource taps into the vast store of knowledge of some of today's most prominent thought leaders—from industry professionals to respected academics—who have focused on investment performance evaluation for a majority of their careers. Divided into five comprehensive parts, this timely volume opens with an extensive overview of performance measurement, attribution, and appraisal. Here, you'll become familiar with everything from the algebra of time-weighted and money-weighted rates of return to the objectives and techniques of performance
appraisal. After this informative introduction, Investment Performance Measurement moves on to: Provide a solid understanding of the theoretical grounds for benchmarking and the trade-offs encountered during practice in Part II: Performance Measurement. Describe the different aspects of attribution analysis as well as the determinants of portfolio performance in Part III: Performance Attribution. Address everything from hedge fund risks and returns to fund management changes and equity style shifts in Part IV: Performance Appraisal. Recount the history and explain the provisions of the GIPS standards—with attention paid to the many practical issues that arise in the course of its implementation—in Part V: Global Investment Performance Standards. Filled with invaluable insights from more than fifty experienced contributors, this practical guide will enhance your understanding of investment performance measurement and put you in a better position to present and evaluate results in the most effective way possible.

Ken Jennings's Trivia Almanac - Ken Jennings
2008-01-15
Ken Jennings’s Trivia Almanac is the ingeniously organized book where, for a change, the all-time Jeopardy! champ gets to ask the questions—and where every day of the year will give you the chance to test your trivia mettle. For example—February 21: In 1912, on this day, Teddy Roosevelt coined the political phrase “hat in the ring,” so Ken Jennings fires off a series of “ring” questions. What two NFL quarterbacks have four Super Bowl rings each?* What rings are divided by the Cassini Division?** Also on this date, in 1981, the “goth” music scene was born in London, so here’s a quiz on black-clad icons like Darth Vader, Johnny Cash, and Zorro. Do you know the secret identities of Ivanhoe’s Black Knight*** or Men in Black’s Agent M****? In this ultimate
book for trivia buffs and other assorted know-it-alls, the 365 entries feature “This Day in History” factoids, trivia quizzes, and questions categorized by Jennings as “Easy,” “Hard,” and “Yeah, Good Luck.” Topics cover every subject under the sun, from paleontology to mixology, sports feats to Bach suites, medieval popes to daytime soaps. This addictive gathering of facts, oddities, devilishly clever quizzes, and other flights of fancy will make each day a fun and intriguing new challenge.
