Crossroads in Literature and Culture - Jacek Fabiszak 2012-11-05 The book contains a selection of papers focusing on the idea of crossing boundaries in literary and cultural texts composed in English. The authors come from different methodological schools and analyze texts coming from different periods and cultures, trying to find common ground (the theme of the volume) between the apparently generically and temporally varied works and phenomena. In this way, a plethora of perspectives is offered, perspectives which represent a high standard both in terms of theoretical reflection and in-depth analysis of selected texts. Consequently, the volume is addressed to a wide scope of both scholars and students working in the field of English and American literary and cultural studies; furthermore, it will be of interest also to students interested in theoretical issues linked with investigations into literature and culture.

Seeking a Role - Brian Harrison 2009-03-26 In this, the first of two self-standing volumes bringing The New Oxford History of England up to the present, Brian Harrison begins in 1951 with much of the empire intact and with Britain enjoying high prestige in Europe. The United Kingdom could still then claim to be a great power, whose welfare state exemplified compromise between Soviet planning and the USA’s free market. When the volume ends in 1970, no such claims carried conviction. The empire had gone, central planning was in trouble, and even the British political system had become controversial. In an unusually wide-ranging, yet impressively detailed volume, Harrison approaches the period from unfamiliar directions. He explains how British politicians in the 1950s and 1960s responded to this transition by pursuing successive roles for Britain: worldwide as champion of freedom, and in Europe as exemplar of parliamentary government, the multi-racial society, and economic planning. His main focus, though, rests not on the politicians but on the decisions the British people made largely for themselves: on their environment, social structure and attitudes, race relations, family patterns, economic framework, and cultural opportunities. By 1970 the consumer society had supplanted postwar austerity, the socialist vision was fading, and 'the unities' (the theme of his penultimate chapter) had introduced new and even exotic themes and values. Having lost an empire, Britain was still resolutely seeking a role; it had yet to find it.

Creating Digital Music and Sound - Chris Middleton 2006 If you are serious about music, this is the guide to get you started! Creating Digital Music and Sound covers the basic principles of digital music-making, from playing around with prerecorded, royalty-free loops and samples to full-on multitrack recording, synthesis, sampling, MIDI sequencing, surround sound, and mastering. Unlike any comparable music and sound title this book also explores how to record and create soundtracks for videos, movies, animations, and games, and how to add audio to websites. It even includes a look at music-making suites for mobile phones. Every page includes highly visual color coverage of the principles of using music-making and audio recording software from fun tools to professional suites, how to record and edit voices, and how to incorporate instruments both real and virtual into musical work, together with music-making hardware from keyboards and workstations to microphones, headphones, leads, and next-generation storage media.

Building a VoIP Network with Nortel’s Multimedia Communication Server 5100 - Larry Chaffin 2006-08-31 This book begins with a discussion of the current protocols used for transmitting converged data over IP as well as an overview of Nortel’s hardware and software solutions for converged networks. In this section, readers will learn how H.323 allows dissimilar communication devices to communicate with each other, and how SIP (Session Initiation Protocol) is used to establish, modify, and terminate multimedia sessions including VoIP telephone calls. This section next introduces the reader to the Multimedia Consortium Server 5100, and Nortel's entire suite of Multimedia Communications Products (MCP) products. The remaining chapters of the book teach the reader how to design, install, configure, and troubleshoot the entire Nortel product line. If you are tasked with designing, installing, configuring, and troubleshooting a converged network built with Nortel’s Multimedia Communication Server 5100, and Multimedia Communications Products (MCP) products, then this is the only book you need. It shows how you’ll be able to design, build, secure, and maintain a cutting-edge converged network to satisfy all of your business requirements. Also covers how to secure your entire multimedia network from malicious attacks.
