The Adolescent Attachment Projective Picture System-Carole George 2012-04-10 This book presents cutting-edge research on adult attachment together with a complete overview of the Adult Attachment Projective Picture System (AAP), the authors’ validated developmental assessment. In addition to identifying attachment classification groups, the AAP yields important information about dimensions—including defensive processes—not evaluated by other available measures. Detailed case illustrations show how to draw the analyst’s own conclusions from the complex and rich emotional experiences. The AAP can be used in clinical or research settings; the concluding chapter discusses promising applications to studying the neurobiology of attachment.

Patterns of Relating-Malcolm L. West 1994-04-08 The process of emotional attachment, a critical factor in infant and child development, is now recognized as an important component of satisfying adult relationships. Building on the research and theories of developmental psychologists, ethnologists, and social scientists, this groundbreaking book describes the characteristics and role of attachment in the adult years and presents new perspectives for understanding and changing an adult’s ability to form lifelong relationships. Chapters provide methods for applying ideas about adult attachments to social relationships and clinical intervention, defining attachment in terms of its impact on relationship and social development in childhood and beyond.

Attachment in Adolescence: Reflections and New Angles-Mini Scharf 2011-10-07 In recent years, the number of empirical studies examiningattachment in adolescence has grown considerably, with most focusing on individual differences in attachment security. Therefore, gaps exist in furthering knowledge about the psychological, cognitive, emotional, and social changes that characterize adolescence. This book addresses important changes in attachment processes and organization during this period. The chapter authors, leading researchers in attachment insecurities, address key topics in attachment process insecurities. These include issues such as the normative distancing from parents and the growing importance of peers, the formation of adolescent attachments, hierarchies, the changing nature of attachment from infancy to adulthood, and the different strategies adolescents use to deal with these issues. The book integrates the various attachment patterns for adults, and for demonstrating the clinical and therapeutic relevance of these constructs. This book is aimed at developmental psychologists, clinicians, and social scientists in psychiatry, psychology, and related mental health disciplines. Also an appropriate text for theoretical and clinical courses in psychiatry, psychology, and social work.

What Can Parents Do?—Margaret Kerr 2008-04-15 In recent years, research on parenting has changed from one where parents shape children to outcomes to an interactive perspective. However, this shift is only now transferring to adolescents, with research exploring how the roles that adolescents and parents play in their interactions can lead to problem behavior. Part B of The Hot Topics in Developmental Research series, this book presents the new perspectives. Patterns of Attachment—Mary D. Sailor Ainsworth 2015-06-06 Ethological attachment theory is a landmark of 20th century social and behavioural sciences theory and research. This new edition provides the reader new perspectives and innovative approaches to attachment theory, including a focus on the role of the child’s primary caregiver, the effects of early experiences and attachment style on subsequent social and emotional development, and the role of early experiences in shaping adult social relationships.
